August 2021

PART I

Eastern mountain gorillas from Rushegura family Group.
Bwindi impenetrable forest national park, Uganda.

This image was taken during a trekking in the Bwindi impenetrable forest national park in Uganda (8th August 2021). It took almost 4 hours to reach the Rushegura family group. This playful baby gorillas were having fun next to us. In the picture, the gorillas are fearless and full of joy. The mother was nearby and making sure they did not get in trouble. Unique experience.

Mother and baby eastern mountain gorillas from Rushegura family group. While I was resting after the long trekking in the middle of the impenetrable jungle, this female gorilla and her baby walked just next to me and decided to stop and sit on my leg using it as a chair. While the female was eating, the baby searched for a more comfortable and protected place surrounded by his mother arms. 5 minutes later the couple continued peacefully along the path following the enormous silverback male.

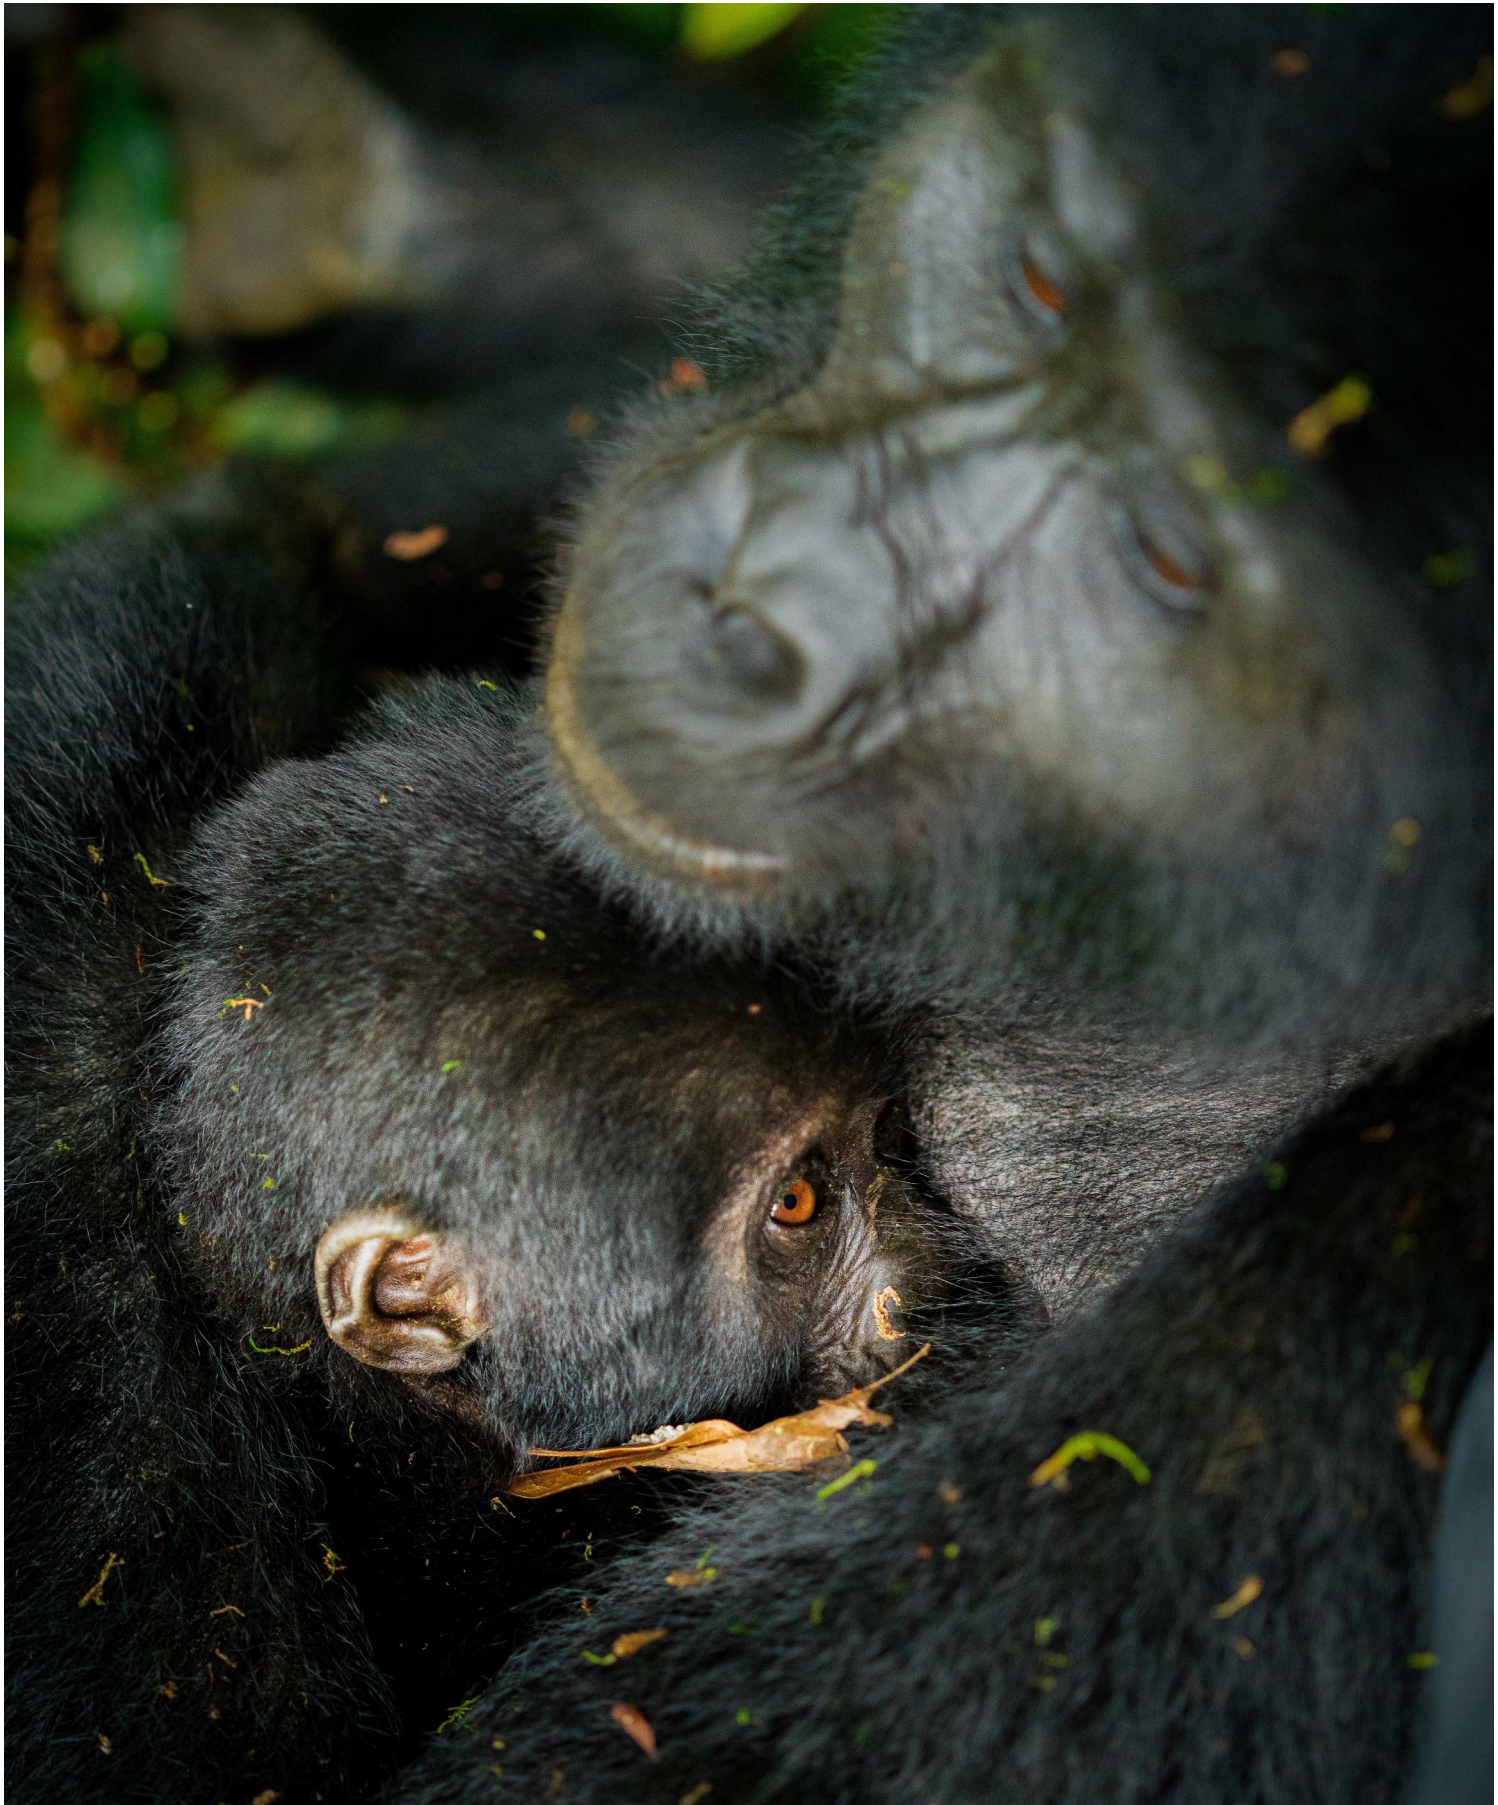

PART II

Chimpanzees group.
Kibale national park, Uganda.

The 4th of August I was in a trekking in the Kibale national park. Suddenly I notice someone was steering at me. I turned to the right and I discover a chimpanzee laying in the jungle floor looking curiously at me. He was not afraid, but relaxed. This moment lasted a while.
